

qred. | Strategy proposal Implementation

Strategy

- 1- Addresses delays in API implementation.
- 2- Addresses alignment of technical expertise matters between peers.
- 3- Addresses frustration due to layers misalignment.
- 4- Addresses need for async and parallel development.

user interface & functionalities

Functionalities

- upper menu page
- bank selection
- card overview
- card activation
- account overview
- transactions overview
- account page
- transactions page
- contact support page

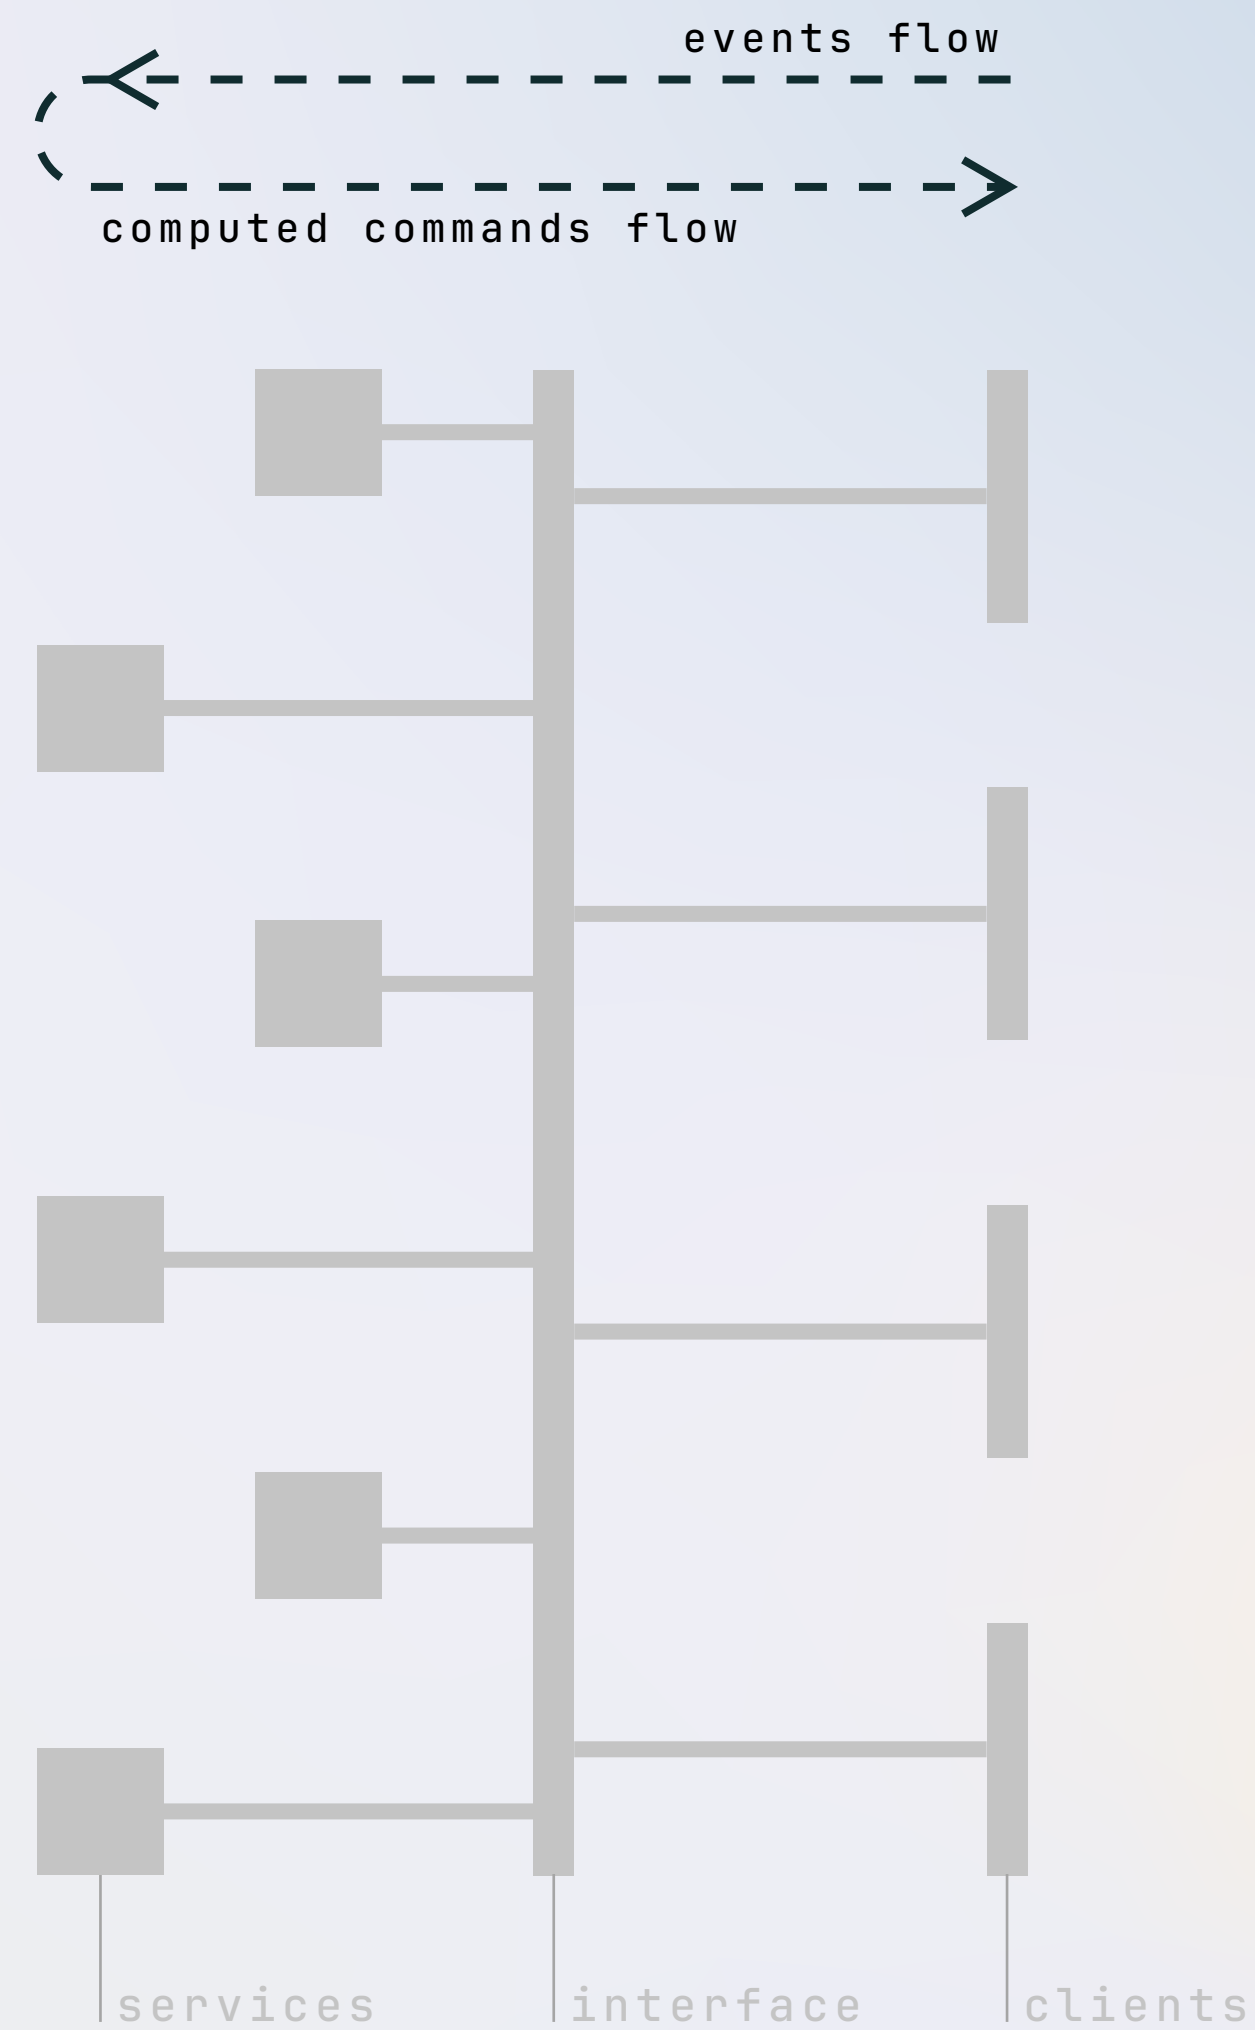

Required info

- list of banks
 - name
 - id
- card
 - id
 - image
 - last digits
 - status
- financial
 - remaining amount
 - limit
- transactions
 - id
 - label
 - date
 - amount

Features

- account selection
- card overview
- card activation
- account overview
- transactions overview
- overview endpoint
- card activation endpoint
- account selection endpoint
- users storing
- accounts storing
- cards storing
- transactions storing

Architecture

State machine

```
{
  "user": { "id": "u_1" },
  "accounts": [
    { "id": "acc_1", "name": "Nordic Bygg" },
    { "id": "acc_2", "name": "Stockholm Måleri" }
  ],
  "selectedAccount": {
    "id": "acc_1",
    "name": "Nordic Bygg",
    "card": {
      "id": "card_1",
      "last4": "1234",
      "status": "inactive",
      "brandImageUrl": "/assets/qred-logo.svg"
    },
    "balance": {
      "remaining": { "amount": 540000, "currency": "SEK" },
      "limit": { "amount": 1000000, "currency": "SEK" }
    },
    "latestTransactions": [
      {
        "id": "tx_3",
        "merchant": "Circle K",
        "amount": { "amount": -4800, "currency": "SEK" },
        "date": "2026-09-25T10:12:00Z"
      },
      {
        "id": "tx_2",
        "merchant": "Clas Ohlson",
        "amount": { "amount": -6200, "currency": "SEK" },
        "date": "2026-09-24T15:40:00Z"
      },
      {
        "id": "tx_1",
        "merchant": "Adobe",
        "amount": { "amount": -2600, "currency": "SEK" },
        "date": "2026-09-23T08:00:00Z"
      }
    ]
  }
}
```

Endpoints

```
GET /user/:userId
PATCH /user/:userId/card/:cardId
POST /user/:userId/account/:accountId
```

Schema

```
users
  id
  selected_account_id
  created_at
accounts
  id
  user_id
  name
  currency
  credit_limit
  remaining
  created_at
cards
  id
  account_id
  last4
  status
  updated_at
transactions
  id
  account_id
  merchant
  amount
  occurred_at
```

Thank you!
